

CHANGE THE WAY YOU BUILD

CONSTRUCTION ROBOTICS AND COUNTY MATERIALS CORPORATION ARE PARTNERING TO SUPPORT YOUR PROJECTS.

OVERSIZED CMUs + MULE = THE MULE METHOD.

SMART LIFTING FOR 32," 16"X16", AND 12"X16" BLOCK, SPLIT FACE, AND STONE VENEER.

For more than 75 years, County Materials' concrete masonry products have been used to help build the communities where Americans live, work, and play.

Starting from humble beginnings in 1946, County Materials is now recognized as an industry leader, dedicated to providing reliable solutions that continuously up the ante and advance the construction and landscape industries.

County Materials offers one of the largest, most diverse collections of masonry products on the market, demonstrating variety in shape, size, color, and face options. Our products are top quality at a competitive price.

County Materials' investments in production facilities and manufacturing technologies have allowed the company to continuously push the limits and lead with innovation. From load bearing to thin veneer concrete units, the strength, durability, and design of County Materials' concrete masonry products are unmatched.

ROBOTICS™**
BUILD SMART

HELP YOUR MASONS LIFT LESS EVERY DAY, AND KEEP THEM ON THE TEAM LONGER.

MULE (Material Unit Lift Enhancer) is a lift-assist device built to handle and place heavy material like the 32" CMU on construction sites to help masons.

- Use fewer, heavier blocks
- Engage in less lifting of oversized materials
- Get more square footage in the wall faster
- Eliminate the risk of injury and low productivity due to fatigue

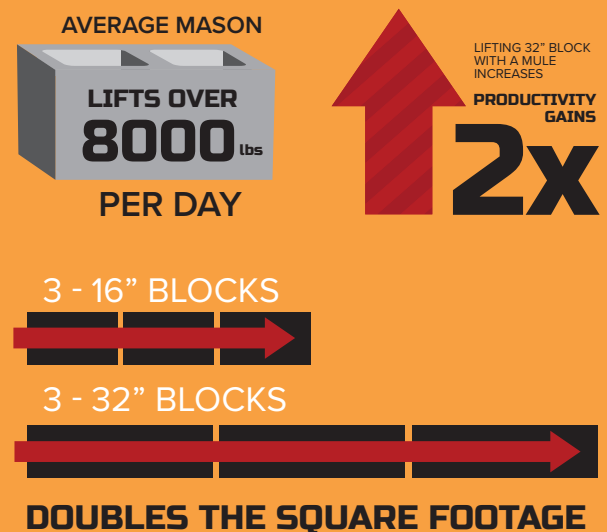

WHY IT'S WORTH THE INVESTMENT

- Increase productivity with MAN + MULE
- Reduce your per block costs and regain your investment in as little as 6 months
- Shorter time to complete walls
- Reduce worker injuries

A new way of working

- Use and move 32" Concrete Masonry Unit (CMUs) to double square footage output.
- MULE smart lifting equipment also moves other oversized blocks like 16"x16," split face, and stone veneer with ease.
- Make MULE your own by adding grippers and other attachments to customize the MULE for your specific jobsite.

LET'S BUILD SMART.
